

6 Watts

- 2:1 Input range
- DIP24 Industry standard package
- Single and dual outputs
- Optional isolation up to 3500VDC
- -40 to +85°C Operation
- Plastic case optional
- 5 Year warranty

The GCB06 series of low cost DC/DC converters come in both single and dual outputs in a DIP 24 pin package. Inputs are available in 12, 24 & 48V versions with a 2:1 range and outputs from 3.3 to 24V single and dual. The units operate from -40 to +85°C. High volumes are held in stock for the popular models. All models have a FIDUS 5 year warranty.

Notes

1. High stock items
2. Add 'P' to model number for plastic case
3. Add 'H' to model number for 3500VDC isolation.
4. Under no load conditions the unit may not meet all specifications
5. Do not operate continuously in the red area of the derating curve

Application notes

EMI Filter

The input filter components C1 and L1 can be fitted to help meet conducted emission requirements for the system. They should be mounted as close as possible to the module. Lead lengths should be minimized and where possible avoid running input and output tracks under the module as part of good design practice for best EMC performance. If the module is embedded in a system running from a AC/DC converter, this will have its own additional immunity protection and EMI filtering that will impact the overall system EMI performance.
