

## 60 Watts

- EN50155 for Rail Applications
- Ultra wide 12:1 (9-75V and 14-160V input)
- EN50121-3-2 Class A Emissions for Rail Applications without Additional Components
- Single output
- -40 to 105°C Operation
- Remote on/off and +10%/-20% Output Trim
- 3 Year warranty

The Ultra wide 12:1 QAE60U series of single output DC/DC converters come in a 1/4 brick package. With a nominal input of 36 and 72V and outputs from 5 to 53V. The QAE60U series has both EN50155 and EN50121-3-2 approvals for rail applications. The units operate from -40 to +105°C and come complete with remote on/off function and output trim. All models have a Fidus 3 year warranty.

Dimensions:

2.28 x 1.45 x 0.5" (57.9 x 36.8 x 12.7mm)

### Notes

- For under voltage protection pin add **-V**, for under voltage protection pin and bus pin add **-K**. For positive enable logic add **P** or leave blank for default negative switching logic. For heatsink options add **HS**, **HS1**, **HS2**, **HS3** or **TH** (without threaded holes) if 3rd party heat sink is to be used.
- Series diode or mosfet required for reverse polarity protection
- Input fuse required: 36V 12A fast acting, 72V 8A fast acting

## Application notes

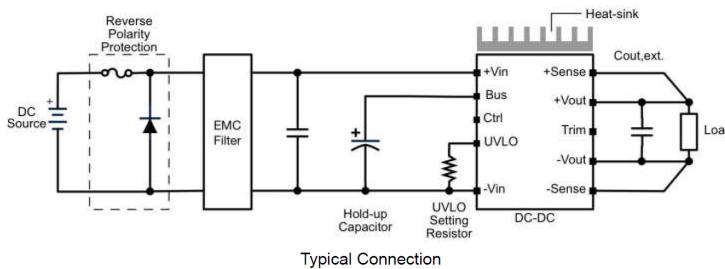

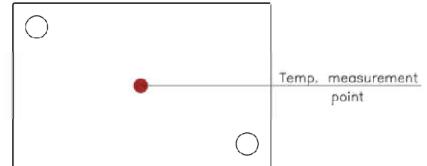

### Thermal Considerations

Sufficient cooling should be provided to ensure reliable operation. Sufficient cooling is monitored by measuring the temperature of the centre point on the bottom of the unit as shown. This temperature should not exceed max case temperature.

Thermal conditions (from which graphs are derived) utilise 20LFM from above.

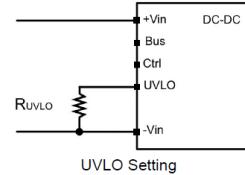

Base-plate dimension 19" x 3.5 x 0.063" (height is EIA standard 2U)

Heatsink can be ordered separately; 7G-0029B-F, 7G-0030B-F, 7G-0031B-F and 7G-0032B-F

### Undervoltage lock out

The ultra wide input QAE60U allows the under voltage lock out to be set higher than the default, by placing a resistor between the –Vin and UVLO pin. Use the equations and constants from the table below for the relevant product variant, to set the UVLO and corresponding shut down and start up voltages.

Part no	A	B	C
QAE60-36XXU	48000	8273	0.96
QAE60-72XXU	120000	12500	2.4

$$V_{start-up} = 1.25 \left( \frac{A(R_{uvlo} + B)}{R_{uvlo} \times B} \right) + 1$$

$$V_{shutdown} = V_{start-up} - C$$

### QAE60-36XXU Examples

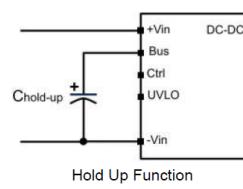

Nominal Input	12V	24V	36V	48V
Start up	8.46V	13.36V	20.56V	27.76V
Shut down	7.5V	12.4V	19.6V	26.8V
UVLO resistor	Open	12.35kΩ	4.98kΩ	3.12kΩ

### QAE60-72XXU Examples

Nominal Input	24V	36V	48V	72V	96V	110V
Start up	14.8V	22V	29.2V	43.6V	58V	66.4V
Shut down	12.4V	19.6V	26.8V	41.2V	55.6V	64V
UVLO resistor	96.77kΩ	17.14kΩ	9.40kΩ	4.94kΩ	3.35kΩ	2.82kΩ

### Hold up

Use the Bus pin to increase hold up time, commonly used to satisfy S2 and C2 described in EN50155. Using the bus pin will reduce layout area, additional capacitance and reduce inrush current. For more information please contact sales with your require-

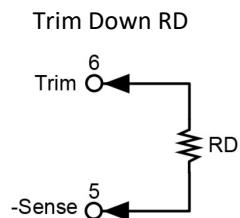

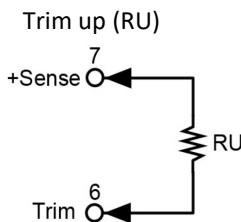

## Trim Tables

Output voltage trim function allows the user to increase or decrease the output voltage set point. The module may be connected with an external resistor (Rtrim) between TRIM pin and either +Vsense or -Vsense. By adjusting Rtrim, the output voltage can be changed by +10% or -20% of nominal the output voltage.

$$RU = \left( \frac{5.11V_{out}(100 + \Delta\%)}{1.225\Delta\%} - \frac{511 + 10.22\Delta\%}{\Delta\%} \right) k\Omega$$

$$RD = \left( \frac{511}{\Delta\%} - 10.22 \right) k\Omega$$

Use the equations to specify the trim up or the trim down resistor values. The resistor should be 1/8W or rated power
