

EP3000AC48TE Rectifier

3000W Output at 48-58Vdc

Product Description

The rectifier EP3000AC48TE is a high Efficiency, single phase, hotpluggable, fan-cooled rectifier and battery charger for stand- alone use or for working in parallel as part of a DC power system equipped with advanced digital controller. The constant output power (3000W i.e. 55.5A at 54V) characteristic supplies the specified power over the full output voltage range (48 to 58Vdc). It's backwardly compatible to earlier version of EP rectifier i.e. EP2500AC48/EP3000AC48.

GE

Critical Power

There is a digital communication (RS-485 bus) between rectifier and controller which allows flexible system design.

Key Features

Highly efficient rectifier Efficiency ≥ 95%

Highly rugged rectifier

Exclusively designed to take care of wide line fluctuations and extreme climatic conditions prevailing typically in rural/ semi-urban areas ("B" & "C" telecom Circles) of India

- A Can withstand up to 500Vac (Line-Neutral) continuously without any damage (for battery floated application)
- A Can withstand 96 hrs of salt spray test (as per ASTM B117), Special protective coating on the PCBs and superior plating on the metal parts
- A Can work up to +70°C

Optimum power performance

Constant power between 176V ... 300V ac, linearly de-rated power between 175V ... 90V ac

Compact and light

Six rectifiers can be accommodated in one row (23" shelf) implying more compact system

Compliant to RoHS Directive 2011/65/EU and amended Directive (EU) 2015/863

Compliant to REACH Directive (EC) No 1907/2006

UL and cUL approved to UL/CSA⁺62368-1, TUV (EN62368-1), CE[§] Mark (for LVD) and CB Report available

Applications

The typical applications for this rectifier are both in indoor and outdoor environments and include:

- Telecommunication Equipment Power
- Wireless Cell Site Power Systems
- Central Office Power Plants
- Base Station Power Plants
